7 continuation or divisional applications.

8 ~~With respect to the Examiner's objections to the abstract, specification, and drawings, the~~  
9 Applicants have amended the abstract, specification, and drawings in accordance with the  
10 Examiner's comments. Applicants thank the Examiner for calling these issues to his attention.

11 In view of the foregoing, applicants respectfully submit that the present invention  
12 represents a patentable contribution to the art and the application is in condition for allowance.  
13 Early and favorable action is accordingly solicited.
